

From the first image:

1. The distal tendon of the tibialis posterior muscle primarily attaches to which bone?
 - a) Base of the distal phalanx of the big toe
 - b) Base of the distal phalanx of the little toe
 - c) Talus
 - d) Navicular tuberosity
2. Which muscle originates from both the fibula and tibia?
 - a) Flexor digitorum longus
 - b) Tibialis anterior
 - c) Soleus
 - d) Gastrocnemius
3. A 45-year-old man has difficulty walking. During a physical examination, he is asked to stand on his right leg, and his left hip drops. Damage to which of the following nerves has caused this disorder?
 - a) Left inferior gluteal nerve
 - b) Left superior gluteal nerve
 - c) Right superior gluteal nerve
 - d) Right inferior gluteal nerve

4. If a patient cannot walk on their heel, there is a probability of pressure on which nerve root (segment)?

- a) L4-L5
- b) L3-L4
- c) S2-S3
- d) S1-S2

5. Which of the following bones has no muscular attachment?

- a) Talus
 - b) Navicular
 - c) Medial cuneiform
 - d) Cuboid
-

From the second image:

6. In case of injury to the common peroneal nerve, all of the following are affected, EXCEPT:

- a) Eversion of the foot
- b) Sensation of the cleft between the first and second toes
- c) Extension of the big toe
- d) Extension of toes two to five

7. What is the most medial muscle in the anterior compartment of the thigh?

- a) Sartorius
- b) Pectineus
- c) Adductor longus
- d) Gracilis

8. The sartorius muscle is located on which wall of the adductor canal?

- a) Posterior-medial
- b) Anterior-lateral
- c) Medial
- d) Lateral

9. All of the following muscles are located in the second layer of the foot, EXCEPT:

- a) Lumbrical
- b) Flexor digitorum accessorius (Quadratus plantae)
- c) Flexor hallucis longus
- d) Flexor digitorum brevis

10. The obturator nerve is divided into anterior and posterior branches by which of the following?

- a) Adductor brevis muscle
 - b) Medial circumflex femoral artery
 - c) Adductor longus muscle
 - d) Adductor magnus muscle
-

From the third image:

11. What is the most lateral element in the superior part of the popliteal fossa?

- a) Common peroneal nerve
- b) Popliteal artery
- c) Tibial nerve
- d) Popliteal vein

12. What is the most medial element that passes deep to the inferior extensor retinaculum?

- a) Deep peroneal nerve
- b) Tibialis anterior
- c) Peroneus tertius
- d) Extensor hallucis longus

13. What is the "unlocking" muscle of the knee?

- a) Quadriceps femoris
- b) Plantaris
- c) Popliteus
- d) Gastrocnemius

14. Which of the hamstring muscles is innervated by the common peroneal nerve?

- a) Ischial head of adductor magnus
- b) Semitendinosus
- c) Short head of biceps femoris
- d) Semimembranosus

15. The L2 nerve root participates in the formation of all the following nerves, EXCEPT:

- a) Obturator
- b) Genitofemoral
- c) Lateral femoral cutaneous
- d) Ilioinguinal

Here are the English translations of the questions and options from the provided images.

From the first image (file: image_1e7727.png):

16. All of the following muscles are innervated by the superior gluteal nerve, EXCEPT:

- a) Tensor fasciae latae 1
- b) Gluteus maximus 2
- c) Gluteus minimus 3
- d) Gluteus medius 4

17. Which of the following bones has a groove on its inferior surface for the passage of the peroneus longus muscle?

- a) Cuboid 5
- b) Talus 6
- c) Navicular 7
- d) Calcaneus 8

18. Which of the following nerves is a direct branch of the lumbar plexus?

- a) Lateral femoral cutaneous nerve 9
- b) Posterior femoral cutaneous nerve 10
- c) Intermediate femoral cutaneous nerve 11
- d) Medial femoral cutaneous nerve 12

19. All of the following are contents of the adductor canal, EXCEPT:

- a) Femoral artery 13
- b) Nerve to vastus medialis 14
- c) Femoral vein 15
- d) Femoral nerve 16

20. All of the following muscles attach to the medial cuneiform bone, EXCEPT:

- a) Tibialis anterior 17
- b) Tibialis posterior 18
- c) Peroneus brevis 19
- d) Peroneus longus 20

From the second image (file: image_1e7708.png):

21. All of the following muscles are in the floor of the femoral triangle, EXCEPT:

- a) Psoas major 21
- b) Pectineus 22
- c) Iliacus 23
- d) Adductor brevis 24

22. All of the following muscles play a role in knee flexion, EXCEPT:

- a) Semimembranosus 25
- b) Gastrocnemius 26
- c) Soleus 27
- d) Biceps femoris 28

23. All of the following pass through the greater sciatic foramen, EXCEPT:

- a) Posterior femoral cutaneous nerve 29
- b) Internal pudendal vessels and pudendal nerve 30
- c) Nerve to obturator externus 31
- d) Sciatic nerve 32

24. All of the following muscles attach to the greater trochanter of the femur, EXCEPT:

- a) Obturator externus 33
- b) Gluteus maximus 34
- c) Piriformis 35
- d) Obturator internus 36

25. Which of the following does not participate in the formation of the trochanteric anastomosis?

- a) Lateral circumflex femoral artery 37
- b) Obturator artery 38
- c) Superior gluteal artery 39
- d) Medial circumflex femoral artery 40
