

Anatomy of upper and lower limb

1- The red and green arrows, respectively refers to which of the following structures ?

Red arrow to Vastus lateralis and green to Sartorius

Red arrow to Sartorius and green to rectus femoris

✓ Red arrow to rectus femoris and green to Sartorius

Red arrow to vastus medialis and green to Sartorius

Anatomy of upper and lower limb

2- The red arrows, refers to which of the following structures ?

Adductor tubercle

✓ Pattellar surface

Greater throchanter

Intercondylar fossa

3- The red arrows refers to which of the following structures ?

Saphenous nerve

Common peroneal (fibular)nerve

✓ Superficial peroneal (fibular)nerve

Deep peroneal(fibular) nerve

4- The red and green arrows, respectively refers to which of the following structures ?

Red arrow to extensor hallucis longus and green to Tibialis anterior muscle

Red arrow to extensor hallucis longus and green to dorsal pedis artery

Red arrow to extensor digitorum longus and green to Tibialis anterior artery

Red arrow to extensor digitorum longus and green to dorsal pedis artery

5- The red and green arrows, respectively refers to which of the following structures ?

Red arrow show deep peroneal nerve and green show Tibialis anterior muscle

Red arrow show common peroneal nerve and dorsal pedis artery

Red arrow show Tibialis anterior artery and green superficial peroneal nerve

Red arrow show Tibialis anterior muscle and green deep peroneal nerve

6- The red and green arrows, respectively refers to which of the following structures ?

Red arrow to lesser Saphenous vein and green to Soral nerve

- ✓ Red arrow to lesser Saphenous vein and green to Saphenous nerve(cutaneous branch)
- Red arrow to femoral nerve and green to Saphnous nerve(cutaneous branch)
- Red arrow to femoral nerve and green to Soral nerve

7- The red arrows refers to which of the following structures ?

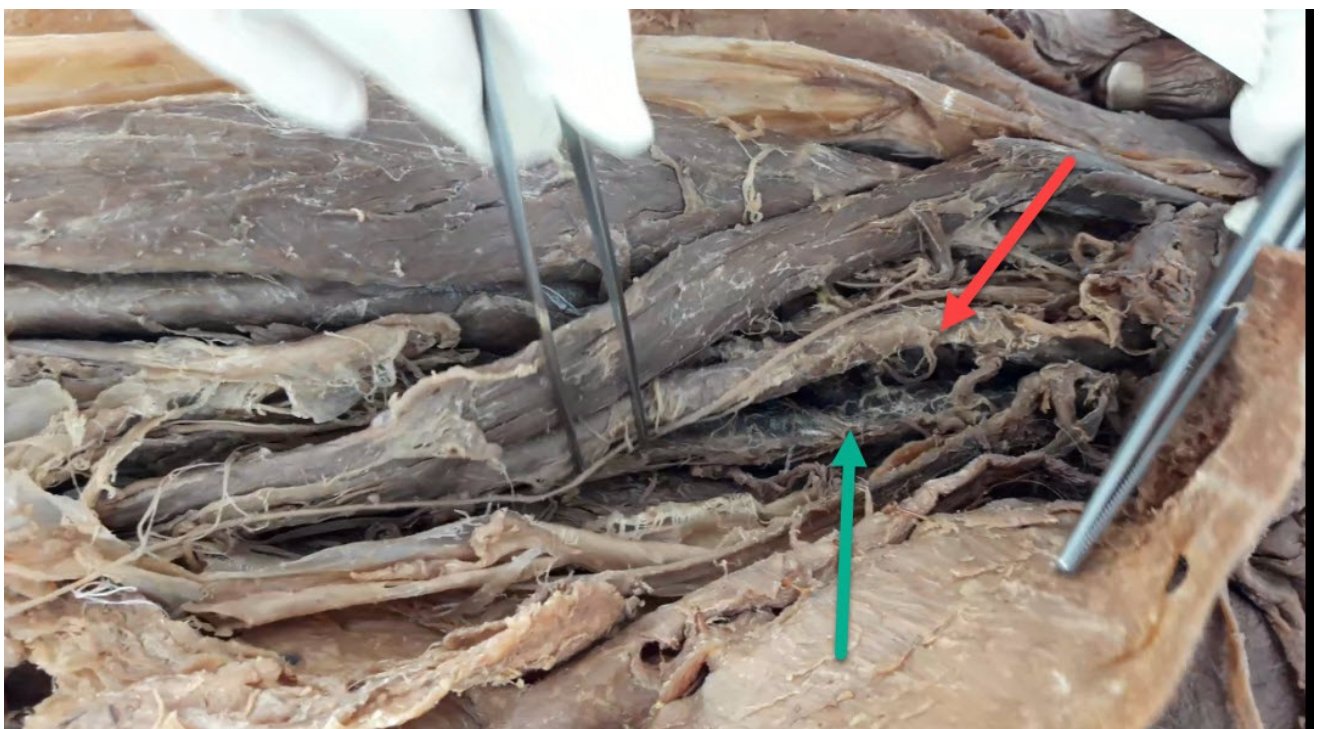

Profunda femoris artery

Descending genicular artery

Medial circumflex femoral artery

✓ Lateral circumflex femoral artery

8- The red and green arrows, respectively refers to which of the following structures ?

Red arrow to femoral nerve and green to femoral artery

Red arrow to femoral artery and green to femoral vein

Red arrow to femoral nerve and green to femoral vein

Red arrow to femoral artery and green to Sartorius

9- The red and green arrows, respectively refers to which of the following structures ?

Red arrow to flexor digitorum longus tendon and green to Flexor Hallucis longus tendon

Red arrow to Tibialis posterior tendon and green to Flexor digitorum longus tendon

Red arrow to Tibialis posterior tendon and green to Flexor Hallucis longus tendon

Red arrow to Flexor digitorum longus tendon and green to Tibialis posterior tendon

10- The red arrow, refers to which of the following structures ?

Anterior inferior iliac spine

pubic tubercle

Obturator crest

Arcuat line

Anatomy of upper and lower limb

11- -Identify The Structure At The Tip Of The

Lateral cutaneous nerve of forearm

Medial cutaneous nerve of forearm

✓ Superficial branch of radial nerve

basilic vein

12- Identify The Structure At The Tip Of The Arrow

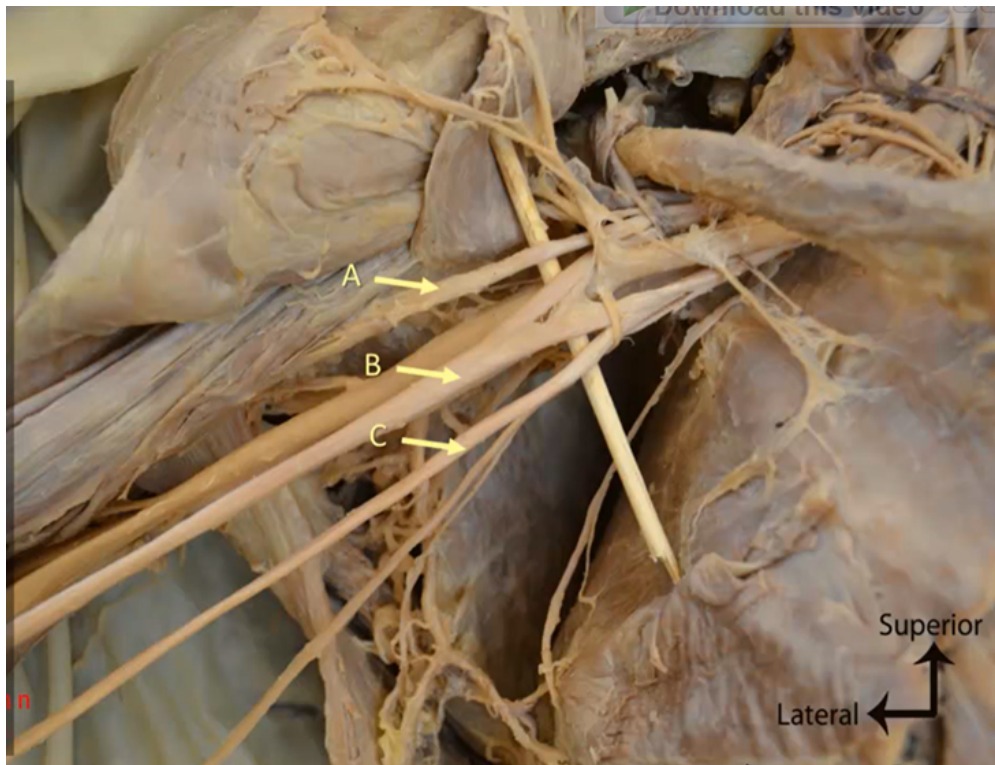

- ✓ Flexor carpi ulnaris
- Flexor carpi radialis longus
- Flexor digitorum superficialis
- Flexor carpi radialis brevis

13- Identify The Structure At The Tip Of The Arrow.

- Pronator quadratus
- ✓ Pronator teres
- Flexor pollicis longus
- supinator

14- Identify A – B- C in order?

ulnar nerve - medial nerve -musculocutaneous - -

Lateral cord –median nerve- medial cord-

musculocutaneous -medial nerve- ulnar nerve

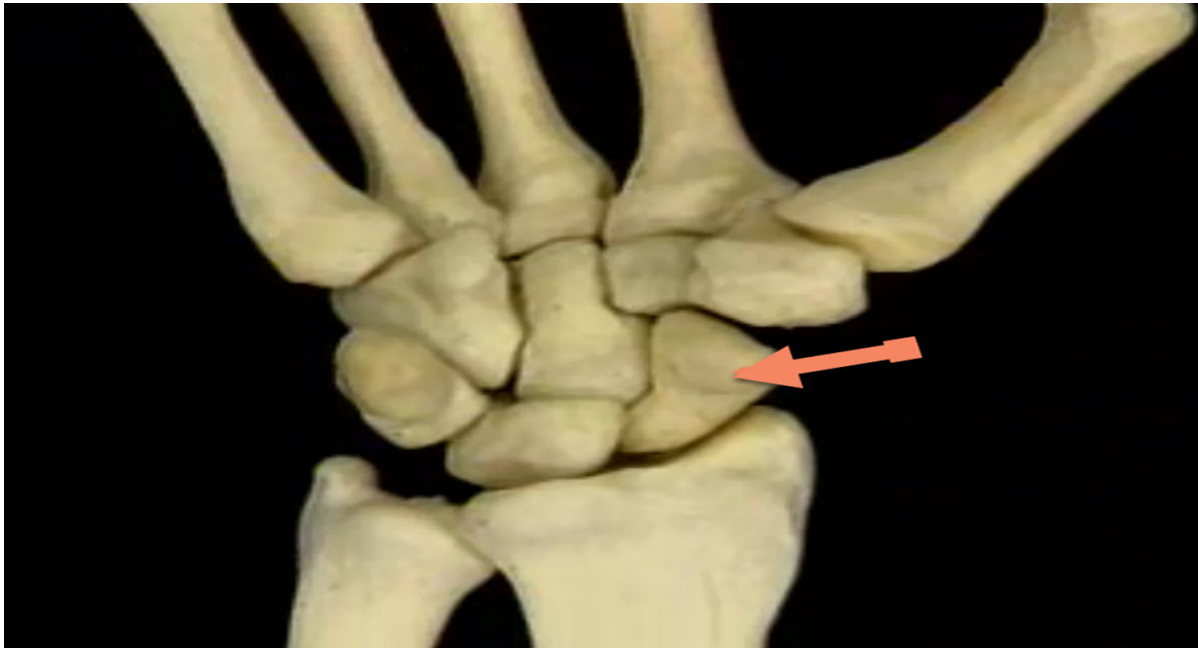

Axillary nerve- median nerve- Medial cutaneous nerve of arm

15- Identify The Structure At The Tip Of The Arrow

- ✓ flexor pollicis brevis
- adductor pollicis
- abductor pollicis brevis
- opponens pollicis

16- Identify The Structure At The Tip Of The Arrow

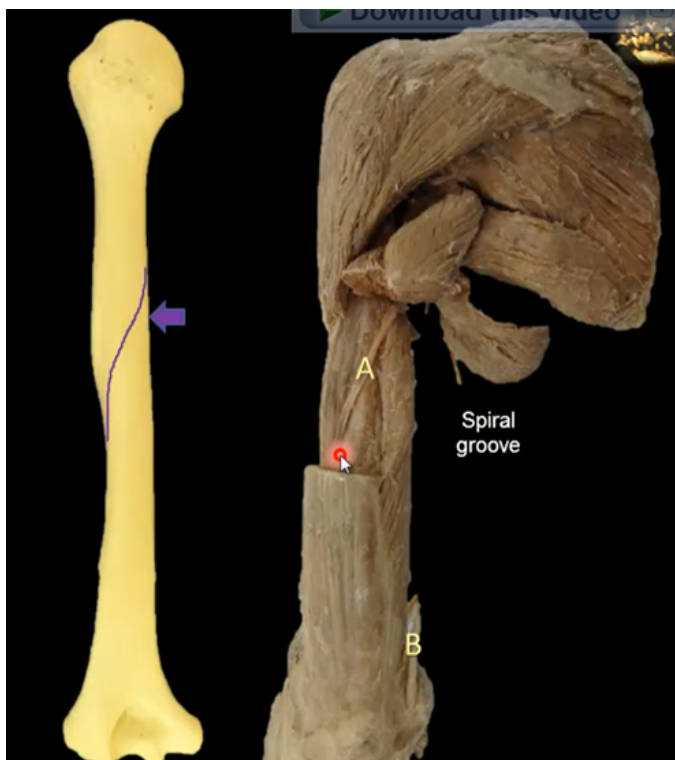

Trapezoid

Lunate

✓ scafold

Trapezium

17- Identify The Structure At The Tip Of The A ?

Posterior cutaneous nerve of arm

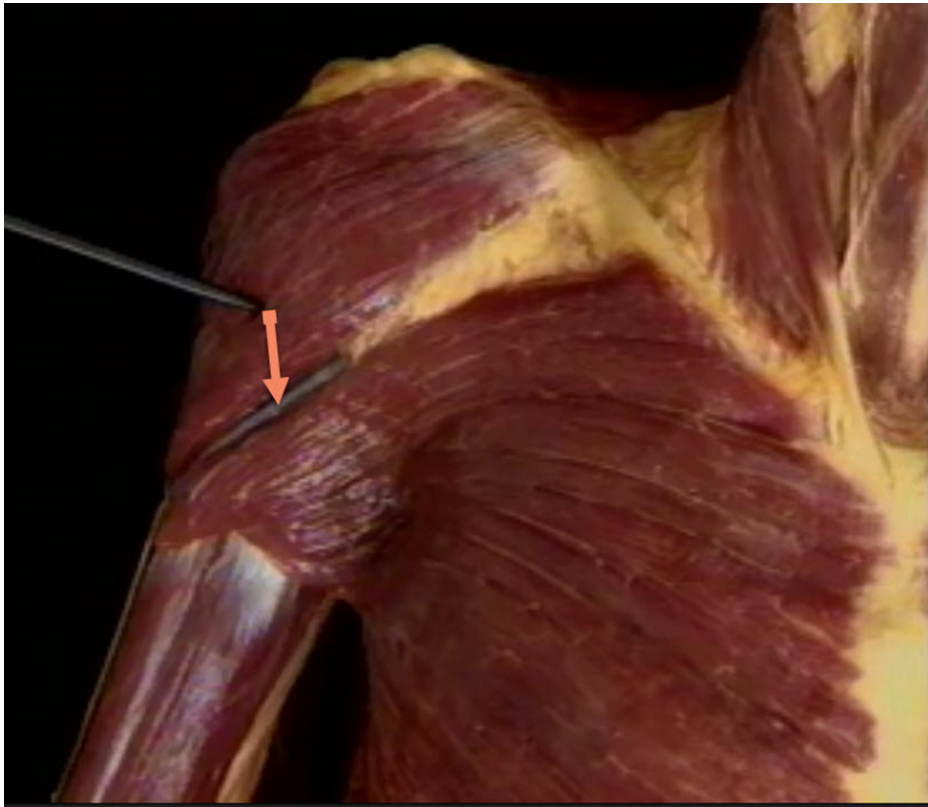

Profuna brachi

Axillary nerve

Radial nerve

18- Identify The Structure At The Tip Of The Arrow

Thoracoacromial Artery

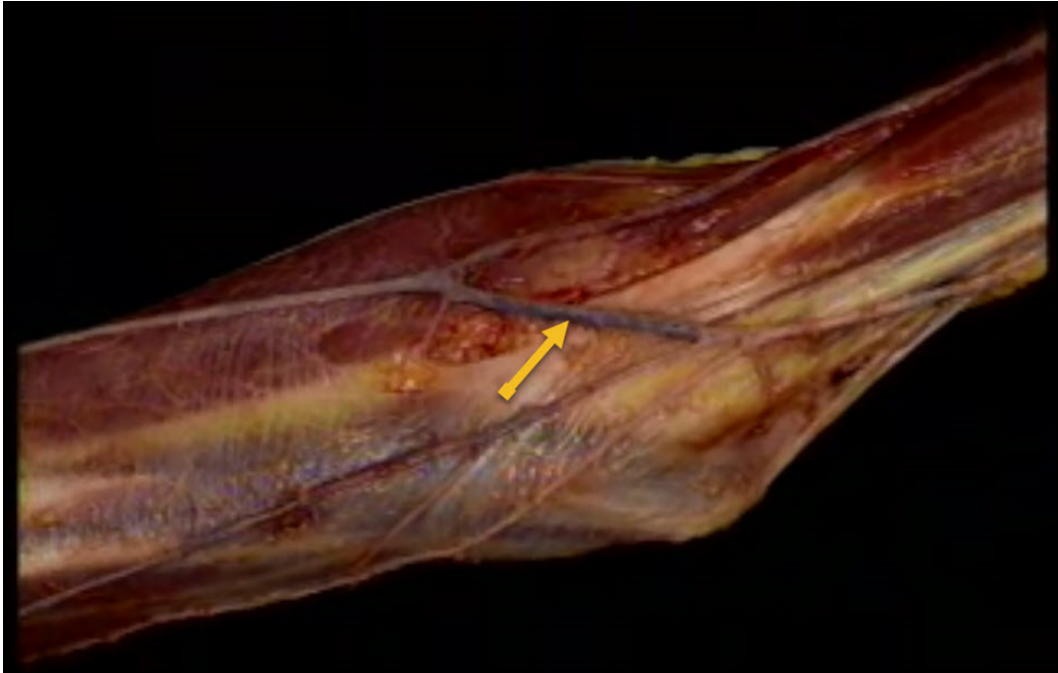

Medial pectoral nerve

Cephalic vein

Lateral pectoral nerve

19- Identify The Structure At The Tip Of The Arrow

basilic vein

Cephalic vein

Median cubital vein

Antebrachial vein

20- Identify The Structure At The Tip Of The Arrow

Extensor digitorum

dorsal digital expansion

Extensor Indicis

Extensor digiti minimi
