

Final Exam
International Campus, DDS,PharmaD
Program
practical biochemistry
February 2023 semester

Name and Surname: *Arman*

Student ID Number: *1400122999*

Course Coordinator: Dr. Dashti

Date of Exam: Jul 15, 2023

Duration of Exam: 17 Minutes

MCQ Question

17

Directions:

- Each of the following questions contains one correct answer only.
- Please choose the correct answer for the MCQs in the answer sheet with pencil.

Basic practical biochemistry		Question time (seconds): →
1	In the presence of concentrated sulfuric acid, carbohydrates lose.....and form.....?	
	1	CO ₂ , diazine
	2	H ₂ O, furfural
	3	H ₂ O, diazine
	4	O ₂ , furfural
2	Which of the following test can be used as a semi quantitative test for sugars?	
	1	Molisch test
	2	Seliwanoff test
	3	Benedict test
	4	Barfoed test
3	Which of the following sugars has a positive result for Barfoed' test?	
	1	Starch, glucose, fructose
	2	Lactose, galactose, fructose
	3	Maltose, sucrose, glucose
	4	xylose, arabinose, fructose
4	Which part of spectrophotometer machine convert radiant energy (photons) into an electrical signal?	
	1	Light source
	2	Monochromator
	3	Cuvettes
	4	Detector
5	Beer Lambert's law gives the relation between which of the following?	
	1	Reflected radiation and concentration
	2	Scattered radiation and concentration
	3	Energy absorption and concentration
	4	Energy absorption and reflected radiation
6	In chromatography, which of the following can be used as the mobile phase?	
	1	Solid or liquid
	2	Liquid or gas
	3	Gas only
	4	Liquid only
7	In an anion exchange chromatography the stationary phase has.....charge and in cation exchange chromatography the stationary phase has.....charge.	
	1	positive-neutral
	2	negative-positive
	3	positive- negative
	4	neutral-negative
8	In size exclusion chromatography, the stationary phase is.....	
	1	silica gel
	2	adsorbents
	3	cation exchange resin
	4	porous matrix

9	IR spectrophotometer uses light over the
1	185
2	400
3	500
4	700
10	Flame Photometry is for determining :
1	Concentration of metal ions
2	Concentration of colored solutions
3	Concentration of liquids
4	Concentration of organic solutions
11	Which of the following is used in inorganic chemical analysis?
1	Chromatography
2	Flame Photometry
3	Spectrophotometry
4	colorimetry
12	In Mohr pipetes :
1	The graduation on these end before the tip
2	The graduation marks continue to the tip
3	Has a single graduation to deliver specific volume
4	Are disposable
13	Watch Glass is used to :
1	crush solids into powders
2	dry and weigh solid compounds
3	dissolve the solids
4	heat and evaporate liquids
14	Mortar and Pestle are used to :
1	crush solids into powders
2	dry and weigh solid compounds
3	dissolve the solids
4	heat and evaporate liquids
15	Which of the following is used to dispensing solid chemicals?
1	Forceps
2	Spatulas
3	Glass Rods
4	Mortar
16	In a titration experiment how do we know the end point has reached?
1	By using indicators
2	With an acid
3	With a base
4	Measuring pH
17	In DNA extraction which of the following is used for breaking the cell walls?
1	acid
2	base
3	soap
4	ammonium
