

سلول و ملکول عملی

1- Presence of carbohydrates is confirmed by which test?

Ninhydrin test

Millons test

Molisch test

Biuret test

2- The purple ring of Molisch reaction is due

to

Furfural + α Naphthol

$^{\circ}\text{C}$ Naphthol

Furfural

Furfurol + H_2SO_4 + α -Naphthol

3- Ninhydrin with evolution of CO_2 forms a

coloured complex with

Peptide bond

α -Amino acids

Histamine

Serotonin

4- Which of the following tests is specific for albumin?

Xanthoproteic test

Millon's test

Molisch test

Paulys test

5- Which of the following tests indicates the presence of a reducing sugar?

Molisch test

Fehling's test

Millons test

Ninhydrin test

6- The mobile phase in chromatography is :

Solid-solid

Liquid-gas

Liquid-solid

Solid-gas

7- Flame Photometry is for determining :

Concentration of metal ions

Concentration of colored solutions

Concentration of organic solutions

Concentration of liquids

8- Iodine solution produces no color with

Dextrin

Starch

Glycogen

Cellulose

9- In Mohr pipetes :

Has a single graduation to deliver specific volume

The graduation marks continue to the tip

Are disposable

The graduation on these end before the tip

10- Hopkins-Cole test is for identification of

Tryptophan

Cysteine

Arginine

Tyrosine

11- Which of the following is used in inorganic chemical analysis ?

Spectrophotometry

Flame Photometry

Colorimetry

Chromatography

12- Guanidine group of arginine gives

positive test with

Sakaguchi reagent

Trichloroacetic acid

Molisch's reagent

Lead acetate

13- Aromatic amino acids can be detected by

Millon-Nasse reaction

Sakaguchi reaction

Hopkins-Cole reaction

Xanthoproteic reaction

14- Which of the following tests is specific for amines, phenols and imidazole?

Biuret test

Xanthoproteic test

Molisch test

Paulys test

15- Which of the following indicates the presence of amino acids?

Millons test

Molisch test

Ninhydrin test

Fehling's test

16- Millon's test is for identification of

Tyrosine

Proline

Arginine

Tryptophan

17- Watch Glass is used to :

dissolve the solids

dry and weigh solid compounds

crush solids into powders

heat and evaporate liquids

18- What is the color of Phenolphthalein in acidic solutions?

Pink

Colorless

Blue

Yellow

19- A positive Benedict's test is not given by

Lactose

Glucose

Sucrose

Maltose

20- What is the color of Phenolphthalein in basic solutions :

Blue

Colorless

Pink

Yellow

21- Which of the following is used to dispensing solid chemicals?

Mortar

Forceps

Spatulas

Glass Rods

22- Which of the following is insoluble in water?

Starch

Fructose

Glucose

Sucrose

23- All the following is true regarding the basic principle of spectrophotometer except ?

Its done over a certain range of wavelength

It depends on how much a substance transmits light

It depends on how much a chemical substance absorbs light

is one of the most useful qualitative analysis

24- Amax is defined as:

relationship between absorbance and concentration

explains the transmittance of light

coloured compound absorbs maximum light at a particular wavelength

it is useful for colorless compounds

25- Mortar and Pestle are used to :

dry and weigh solid compounds

dissolve the solids

heat and evaporate liquids

crush solids into powders

26- In gel permeation chromatography separation is based on....

Ion exchanging

Solubility

Affinity

Size of molecule

27- In a titration experiment how do we know the end point has reached?

With a base

Using indicators

Measuring pH

With an acid
