

سلول و ملکول عملی**1- Which of the following tests is specific for albumin?**

- ☐ Molisch test
- ☒ Millon's test
- ☐ Paulys test
- ☐ Xanthoproteic test

2- Which of the following tests is specific for amines, phenols and imidazole?

- ☐ Molisch test
- ☐ Biuret test
- ☐ Xanthoproteic test
- ☒ Paulys test

3- Which of the following is used in inorganic chemical analysis ?

- ☒ Flame Photometry
- ☐ Spectrophotometry
- ☐ colorimetry
- ☐ Chromatography

4- Flame Photometry is for determining :

- Concentration of organic solutions
- ✓ IConcentration of metal ions
- Concentration of colored solutions
- Concentration of liquids

5- In gel permeation chromatography separation is based on....

- Affinity
- Ion exchanging
- ✓ Size of molecule
- Solubility

6- Iodine test is used for detection of which of the following?

- ✓ Starch
- Enzymes
- Protein
- Lipids

7- Which of the following test is specific for indole group?

- Molisch test
- Ninhydrin test
- ✓ Hopkins-cole test
- Xanthoproteic test

مدت آزمون: 20 بر اساس دفترچه کاربر cell&molecules practical: آزمون

8- Which of the following solutions is used in Biurets test ?

- ☐ Nitric oxide
- ☒ Copper sulphate
- ☐ Hydrogen peroxide
- ☐ Oxalic Acid

9- All the following is true regarding the basic principle of spectrophotometer except ?

- ☐ Its done over a certain range of wavelength
- ☒ is one of the most useful qualitative analysis
- ☐ It depends on how much a substance transmits light
- ☐ It depends on how much a chemical substance absorbs light

10- Millons test is specific for detection of which of the following?

- ☒ Tyrosine
- ☐ Lysine
- ☐ Leucine
- ☐ Glycine

11- In a titration experiment how do we know the end point has reached?

- ☐ With an acid
- ☐ With a base
- ☐ Measuring pH
- ☒ Using indicators

مدت آزمون: 20 بر اساس دفترچه کاربر cell&molecules practical: آزمون

12- All the following is soluble in water except ?

- Fructose
- Sucrose
- Glucose
- ✓ Starch

13- Amax is defined as:

- explains the transmittance of light
- it is useful for colorless compounds
- ✓ coloured compound absorbs maximum light at a particular wavelength
- relationship between absorbance and concentration

14- Molisch test is for confirming the presence of

- Lipids
- ✓ carbohydrates
- Proteins
- Enzymes

15- The mobile phase in chromatography is :

- Liquid-solid
- Solid-gas
- ✓ Liquid-gas
- Solid-solid

16- Xanthoproteic test is important in analyzing the presence of :

- Carboxyl group
- Ketone group
- Aldehyde group
- ✓ Aromatic nucleus

17- Benedict test is used for detection of which of the following ?

- ✓ Fructose
- Tryptophan
- Tyrosine
- Starch

18- What is the color of Phenolphthalein in basic solutions :

- ✓ Pink
- Blue
- Yellow
- Colorless

19- Ninhydrin is a test specific for detection of:

- Fatty acids
- Vitamines
- Sugers
- ✓ Amino acids

مدت آزمون: 20 بر اساس دفترچه کاربر cell&molecules practical: آزمون

20- What is the color of Phenolphthalein in acidic solutions?

- ☒ Colorless
- ☐ Blue
- ☐ Yellow
- ☐ Pink

21- Which of the following tests indicates the presence of a reducing sugar?

- ☐ Molisch test
- ☐ Ninhydrin test
- ☒ Fehling's test
- ☐ Millons test

22- Sakaguchi test is specific for detection of which group?

- ☐ Phenol
- ☐ Imidazole
- ☒ guanidinium
- ☐ Indole
