1-

Which of the following cells is found in the lacunae (chambers)

shutterstock.com • 1199855788

Osteocyte

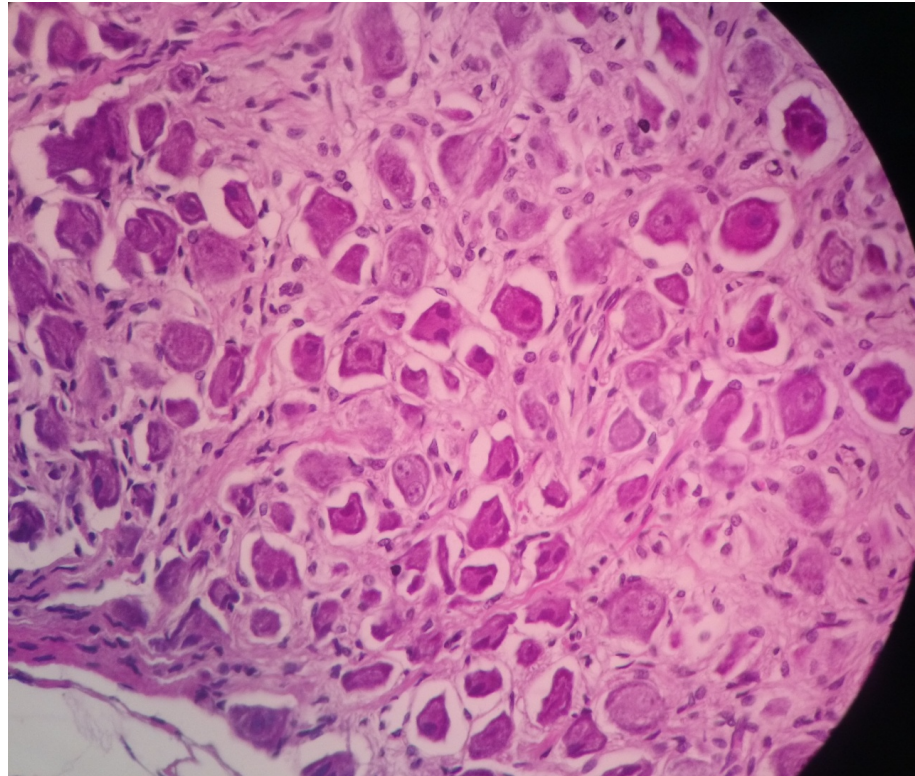

Osteogenic

Osteoclast

Resting

سوال 2-

What is the type of tissue?

Nerve fiber

Ganglion

Tendon

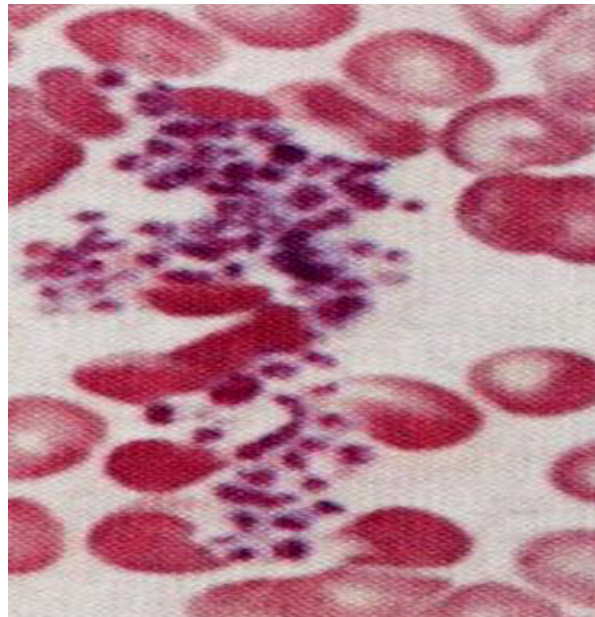

مدت آزمون: 10 بر اساس دفترچه کاربر Tissue Development practical: آزمون

Brown adipose tissue

3-

which cells are shown in this picture?

thrombocytes

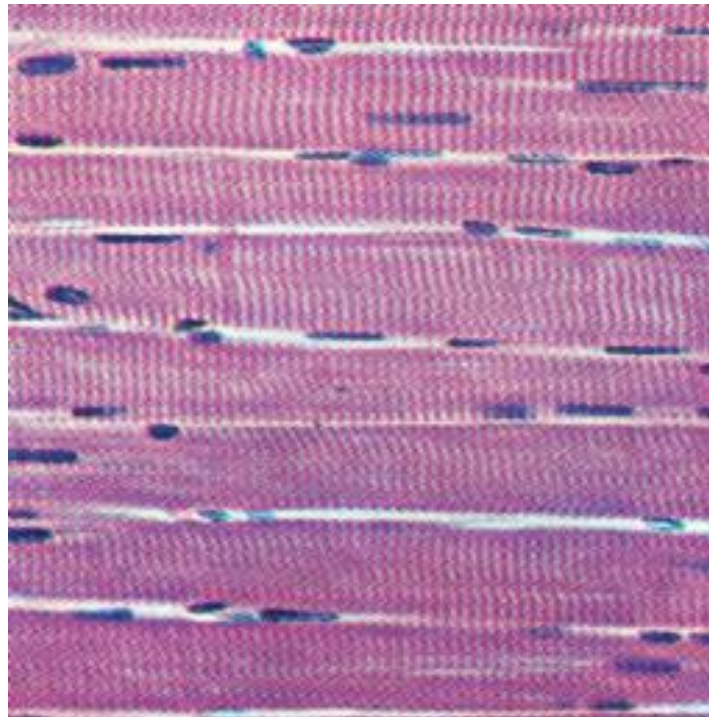

reticulocytes

lymphocytes

monocytes

سوال 4-

This figure show

Cardiac muscle

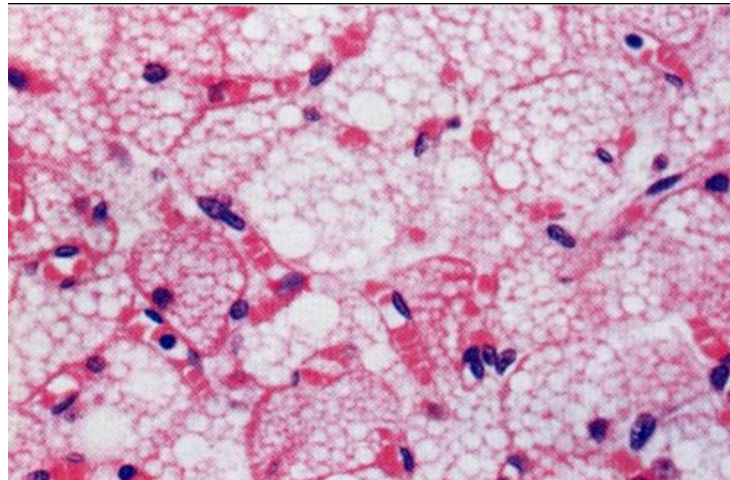

Skeletal muscle

Tendon

Nerve fiber

5-

which type of tissue do you observe in this picture?

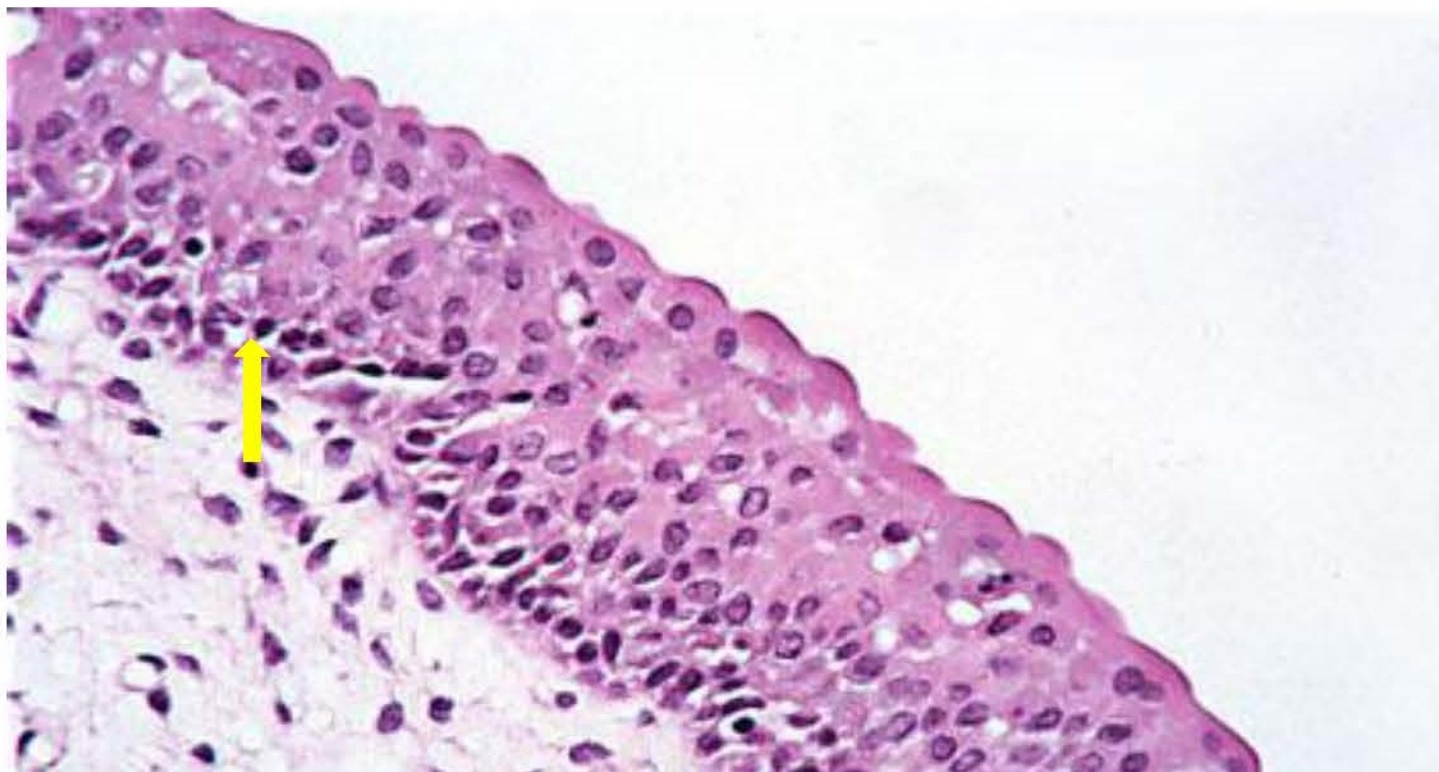

Brown adipose tissue

White adipose tissue

Areolar tissue

Reticular tissue

6- What is the type of epithelium? Arrow show

Squamous stratified- basement membrane

✓ Transitional- basal cells

Simple stratified – basement membrane

Pseudostratified – umbrella cells

7- Which cell do you observe in this picture

fibroblast

fibrocyte

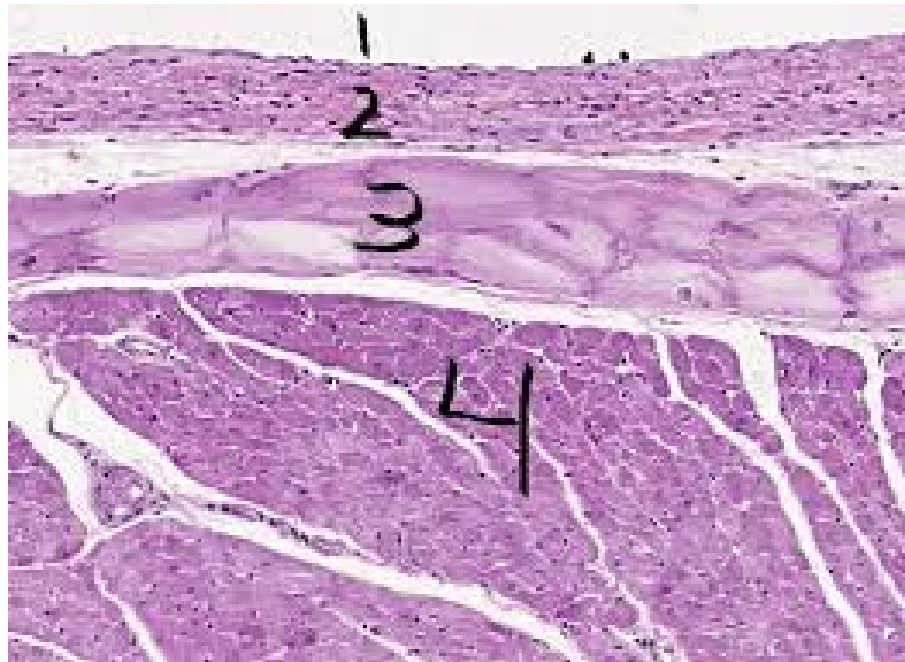

Brown adipocyte

White adipocyte

سوال 8-

which cells are shown in this picture by number 3 ?

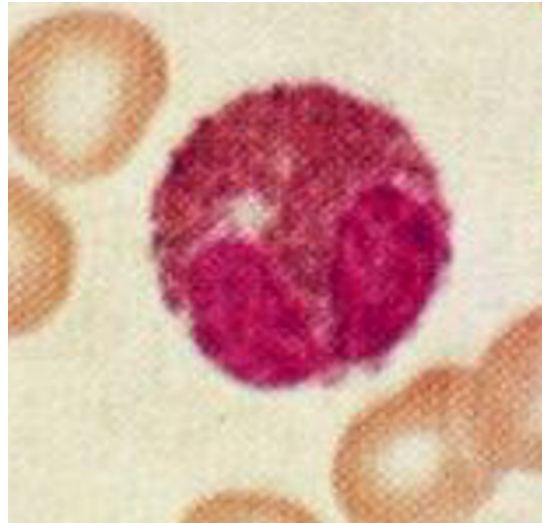

Ganglionic

Epithelial

Fibrocyte

مدت آزمون: 10 بر اساس دفترچه کاربر Tissue Development practical آزمون

Purkinge

9- which cell do you observe in this picture?

lymphocyte

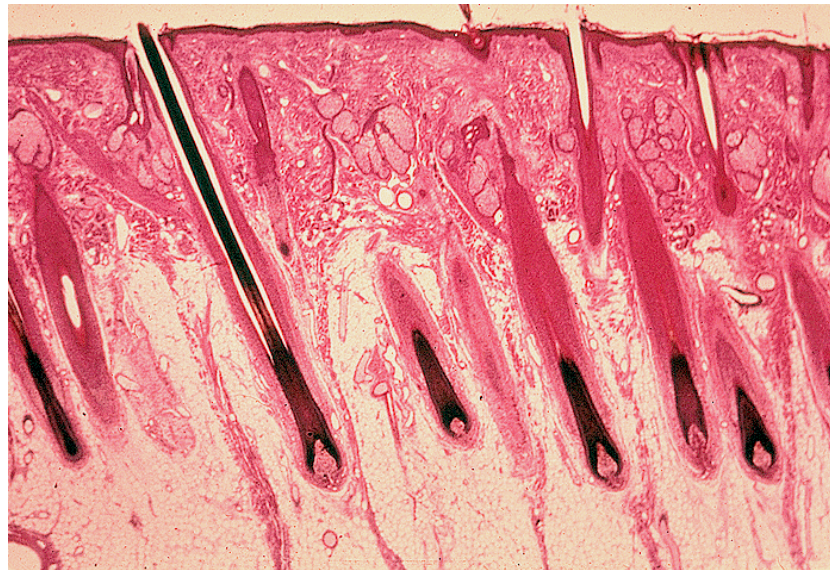

monocyte

eosinophil

basophil

10- This figure show

Thick skin

Thin skin

Squamous stratified epithelium

Skeletal muscle
