

17. سوال

Which of the following muscles insert on the iliotibial tract?

- ☒ 1) Gluteus maximus
- ☐ 2) Gluteus medius
- ☐ 3) Gluteus minimus
- ☐ 4) Quadratus femoris

7. سوال

Which arteries dose not seprated from perfodua femoris?

☒ 1) Decending genicular artery

☐ 2) Medial circumflex artery

☐ 3) Perforating arteries

☐ 4) Lateral cicumflex artery

سوال 15.

The lateral border of the femoral triangle is formed by the?

- ☐ 1) tensor fasciae latae
- ☒ 2) sartorius
- ☐ 3) adductor longus
- ☐ 4) rectus femoris

9 The deep plantar arch of the foot is an anastomosis between the dorsal pedal artery and the following structure on the sole of the foot:

- ☐ 1) Arcuate artery
- ☐ 2) Medial plantar artery
- ☒ 3) Lateral plantar artery
- ☐ 4) Plantar metatarsal arteries

Which of the following muscles is not innervated by a branch of the lumbar sacral trunk?

☐ 1) Tensor facia lata

☐ 2) Biceps femoris

☒ 3) Sartorius

☐ 4) Popliteus

What is the most important proximity of the small saphenous vein?

- ☐ 1) Superficial fibular nerve
- ☐ 2) Lateral sural nerve
- ☒ 3) Medial sural nerve
- ☐ 4) Saphenous nerve

سوال

Which of the following branches does not directly seprated from the posterior tibial artery?

- ☒ 1) Perforating Arery
- ☐ 2) Circumflex fibula Arery
- ☐ 3) Post. Medial maeolar Arery
- ☐ 4) Fibular Arery

It contains peripheral heart?

☐ 1) Gastrocnemius

☒ 2) Soleus

☐ 3) Sartorius

☐ 4) Plantaris

21. What one is a factor in the longitudinal growth of the proximal-distal limb?

- ☒ 1) AER / apical ectodermal ridge
- ☐ 2) Retinoic acid
- ☐ 3) ZPA polarizing activity area
- ☐ 4) No cell death

What ligaments are connected to the vertebral lamina?

- ☐ 1) Anterior longitudinal ligament
- ☐ 2) posterior longitudinal ligament
- ☒ 3) flava ligament
- ☐ 4) Cruciate ligament

25 سوال

Which of the following vessel pierces the oblique popliteal ligament?

- ☐ 1) Descending genicular Artery
- ☐ 2) Anterior tibial recurrent Artery
- ☒ 3) Middle genicular Artery
- ☐ 4) Sciatic Artery

Which of the quadricep femoris muscles performs extension as well as flexion?

- ☐ 1) Vastus lateralis
- ☐ 2) Vastus medialis
- ☐ 3) Vastus intermedius
- ☒ 4) Rectus femori

All of the following muscles are innervated by the obturator nerve exception:

- ☐ 1) Obturator externus
- ☐ 2) Gracilis
- ☒ 3) Obturator internus
- ☐ 4) Adductor longus

Lateral sacral crest due to joints of?

- ☐ 1) Accessory process
- ☐ 2) Articular process
- ☒ 3) Transverse process
- ☐ 4) Mammillary process

Lateral sacral crest due to joints of?

- ☐ 1) Accessory process
- ☐ 2) Articular process
- ☒ 3) Transverse process
- ☐ 4) Mammillary process

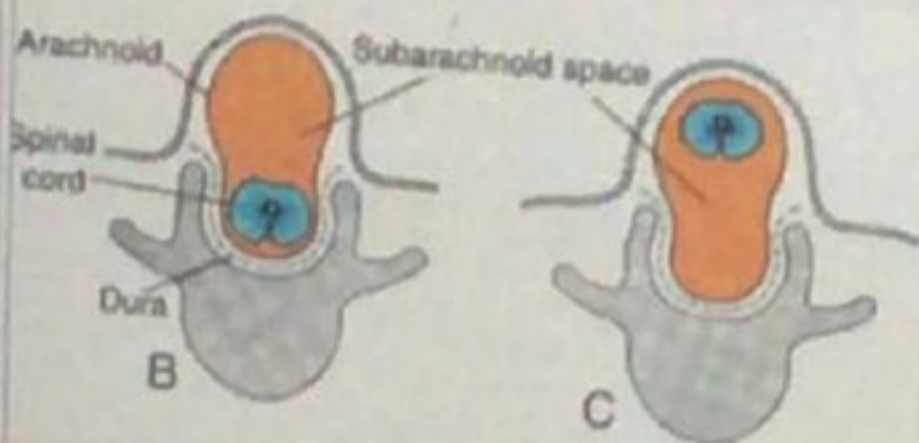

24 What is the important muscles of foot?

- ☐ 1) FHL, Post. tibialis muscles
- ☐ 2) FDL, Ant. Tibialis muscles
- ☒ 3) Ant. & Pos. tibialis muscles
- ☐ 4) FHL & FDL

What is the most important feature of lumbar vertebrae?

- ☐ 1) Spinos process bifurcate & small triangle vertebral canal
- ☐ 2) Large round vertebral canal & Mammillary process
- ☐ 3) Transverse foramen & Large round vertebral canal
- ☒ 4) Accessory process & Quadrilateral spinous process

Name them in order:

- 1) B: spina bifida occulta & C: myelomeningocele
- 2) B: Meningocoele & C: myelomeningocele
- 3) B: myelomeningocele & C: spina bifida occulta
- 4) B: myelomeningocele & C : Meningocoele

سوال 30

What structure does the outer edge of Lina Aspra in the proximal femur?

- ☐ 1) Intertrochantric line
- ☐ 2) Intertrochantric crest
- ☒ 3) Gluteal tuberosity
- ☐ 4) Spiral line

Which muscle passes through the greater sciatic foramen?

- ☐ 1) Superior gemelus
- ☐ 2) Obturator externus
- ☐ 3) Obturator internus
- ☒ 4) Piriformis
