

Name of the Exam:

Respiratory system

Lesson Name:

Anatomy

Time left:

00:09:23

Student's Name:

Khushbu Khushbu

20.

All of the following cartilage has articular facet except....?

- ☐ Thyroid
- ☐ Cricoid
- ☐ Epiglottis
- ☐ Arythnoid

8. If the thickness of the respiratory membrane doubles due to pulmonary fibrosis, what will be CO₂ diffusing capacity, approximately?

- ☐ 50 ml/min/mmHg
- ☐ 100 ml/min/mmHg
- ☐ 200 ml/min/mmHg
- ☐ 300 ml/min/mmHg

Name of the Exam: Respiratory system

Lesson Name: Anatomy

Time left: 00:11:32

Student's Name: Khushbu Khushbu

18. All of the following statement about Maxillary sinus are correct except.....

- ☐ Roof of the sinus forms floor of the orbit
- ☒ Maxillary sinus opening opens in middle meatus
- ☐ It is the largest paranasal sinus
- ☐ The floor of the Maxillary sinus related to the Sphenopalatin foramen

<https://exam.tums.ac.ir/?lan=en>

Name of the Exam:

Respiratory system

Lesson Name:

physiology

Time left:

00:23:49

Student's Name:

Khushbu Khu

7. Diffusion coefficient of a gase in a liquid depends on which following factor?

☒ Pressure difference between the two ends of the diffusion path

☐ Diffusion distance

☐ Gas solubility

☐ Cross-sectional area

Name of the Exam: Respiratory system

Lesson Name: Anatomy

Time left: 00:06:11

Student's Name: Khushbu Khushbu

25.

Anterior margin of Laryngeal inlet forms by

- ☐ Epiglottis
- ☐ Aryepiglottic folds
- ☐ Vestibular ligament
- ☐ Interarytenoid notch

Name of the Exam: Respiratory system

Lesson Name: Anatomy

⌚ Time left: 00:07:26

Student's Name: Khushbu Khushbu

23. All of the following arteries supply nasal cavity except..

- ☒ Superior labial
- ☐ Greater palatin
- ☐ Internal Carotid
- ☐ Superior thyroid

2. If in a premature infant, the size of the alveoli is one-third of the normal value and the amount of surface tension is tripled due to the low production of surfactant, how does the collapse pressure change compared to the normal infant?

- ☐ It triples
- ☐ It increases six times
- ☐ It increases nine times
- ☐ It does not change

3. What is the effect of pleural pressure changes on alveolar pressure during inspiration?

- ☐ The more negative the pleural pressure, the more positive the alveolar pressure
- ☐ The more positive the pleural pressure, the more positive the alveolar pressure
- ☐ The more positive the pleural pressure, the more negative the alveolar pressure
- ☐ The more negative the pleural pressure, the more negative the alveolar pressure

5. If lung compliance and thoracic compliance are the same and assumed to be 300 ml / CmH₂O, what would be the total pulmonary system compliance as ml / CmH₂O?

☐ 150☐ 300☐ 450☐ 600

Name of the Exam: Respiratory system

Lesson Name: physiology

Time left: 00:13:57

Student's Name: Taban Naji Nader

12. Which respiratory center provides strong signals for contraction of the rectus abdominis muscle to increase pulmonary ventilation in deep expiration?

- ☐ VRG
- ☐ DRG
- ☐ Pneumotaxic center
- ☐ Chemosensitive area in medulla

Name of the Exam: Respiratory system

Lesson Name: physiology

Time left: 00:31:45

Student's Name: Taban Naji Nader

Exit

2. According to the V/Q mismatch, what is the difference between the oxygen pressure of the lower, middle and upper alveoli in a healthy and upright subject?

- ☐ Oxygen pressure in the lower alveoli is higher than the middle and upper
- ☐ Oxygen pressure in the upper alveoli is higher than the middle and lower
- ☐ Oxygen pressure in the middle alveoli is higher than the lower and upper
- ☐ Oxygen pressure is the same in all alveoli

Name of the Exam: Respiratory system

Lesson Name: Anatomy

Time left:

Student's Name: Taban Naji Nader

26. Left lung has relation to all of the following structures except...

- ☐ Spleen
- ☐ Arch of the Azygous vein
- ☐ Oesophagus
- ☐ Thoracic Aorta

What is the initial pressure difference for O₂ diffusion from alveoli into the pulmonary capillaries?

- ☐ 64 mmHg
- ☐ 21 mmHg
- ☐ 11 mmHg
- ☐ 5 mmHg

What is the role of Haldan's effect in the respiratory system?

It increases the release of O_2 from hemoglobin

It increases the excretion of CO_2 from the lungs

It reduces the tendency of Fe^{2+} + hemoglobin for binding with oxygen

It reduces the diffusion of CO_2 from peripheral tissue into the capillaries

9. Which of the following IS NOT correct about anatomical shunt?

- ☐ Oxygen pressure decreases from 104 to 95 mm Hg
- ☐ Arterial blood CO₂ pressure increases from 40 to 45 mm Hg
- ☐ Pulmonary vein and bronchial vein blood are mixed
- ☐ It forms part of the physiological shunt

21. All of the following statement about larynx is correct except..

- ☐ Middle cavity of larynx limited above by vestibular folds
- ☐ Middle cavity of larynx expanded lateraly to ventricle
- ☐ Laryngeal saccule open to vestibule
- ☐ Mucus glands in saccules lubricates vocal folds

10. Inhibition of beta-receptors in the airways leads to an increase in which of the following?

- ☐ Anatomical dead space
- ☐ Surface tension
- ☐ Pleural pressure
- ☐ Airway resistance

16. Which factor DOES NOT stimulate the chemosensitive area in the medulla?

- ☐ Increased H^+ concentration in the cerebrospinal fluid
- ☐ Decreased O_2 concentration in blood
- ☐ Increased CO_2 concentration in interstitial fluid of medulla
- ☐ Increased CO_2 concentration in the blood

Name of the Exam: Respiratory system

Lesson Name: physiology

Time left: 00:11:55

Student's Name: Taban Naji Nader

14. What is the effect of using acetazolamide as an inhibitor of carbonic anhydrase on respiratory gases?

- ☐ A decrease in arterial blood O₂ pressure
- ☐ An increase in the O₂ pressure in interstitial fluid
- ☐ A decrease in arterial blood CO₂ pressure
- ☐ An increase in the CO₂ pressure in interstitial fluid

Name of the Exam: Respiratory system

Lesson Name: Histology

Time left: 00:00:07

Student's Name: Taban Naji Nader

31. Which Part Of The Air Ducts Is Observed True Elastic Fiber?

☐ Pharynx Tissue

☐ Broncos

☐ Thracea

☐ Larynex

Name of the Exam: Respiratory system

Lesson Name: Anatomy

Time

24. All of the following nerves innervate nasal cavity except..

- ☐ Olfactory
- ☐ Ophtalmic
- ☐ Recurent laryngeal
- ☐ Maxillary

19.

Posterior inferior nasal nerve is branch of which of the following nerve?

☐ Nasopalatin nerve

☐ Greater Palatin nerve

☐ Anterior Ethmoidal nerve

☐ Posterior Ethmoidal nerve

Name of the Exam:

Respiratory system

Lesson Name:

Anatomy

Time left:

00:03:37

15. What is the role of the pneumotoxic center in regulation of respiration?

- ☐ Stimulation of DRG
- ☐ Stimulation of VRG
- ☐ Inhibition of DRG
- ☐ Inhibition of VRG

Name of the Exam: Respiratory system

Lesson Name: Histology

Time left: 00:00:21

Student's Name: Taban Naji Nader

30. In Structural Histology Which Part Of Nasal cavity Is Observed Goblet Cell?

- ☐ Vestibuli
- ☐ Choncea
- ☐ Palate
- ☐ Respiratory

Name of the Exam: Respiratory system

Lesson Name: Embryology

Time left: 00:00:46

Student's Name: Taban Naji Nader

29. By the end of the 6 month approximately how many generations of the subdivisions have formed in the lungs

☐ 12

☐ 6

☐ 17

☐ 7

Name of the Exam: Respiratory system

Lesson Name: Embryology

Time left: 00:01:39

Student's Name: Taban Naji Nader

Exit

28. The cartilaginous, muscular, and connective tissue components of the trachea and lungs are derived from _____ surrounding the foregut

- ☐ Splanchnic mesoderm
- ☐ Endoderm
- ☐ Neural crest cells
- ☐ 2th pharyngeal arch

All of the following items attached to arythnoid cartilage except..

- ☐ Hyoid bone
- ☐ Vocal ligaments
- ☐ Quadrangular membrane
- ☐ Vestibular ligaments

Name of the Exam: Respiratory system

Lesson Name: Anatomy

Time left: 00:02:14

Student's Name: Taban Naji Nader

27. In surface Anatomy in mid axillary line shadow of plura is at level of which rib

- ☐ 4
- ☐ 6
- ☐ 8
- ☐ 10

What is the effect of vagal stimulation on diameter and mucus secretion of the airways?

Vague nerves are parasympathetic nervous system. Which causes bronchial constriction but no effect on blood vessels but increased mucus secretion.

What is the alveolar pressure (P_{Alv}) difference between the beginning and end of a normal inspiration?

Du

What is the main cause of hysteresis in pressure /volume curve of the lung?

What is the main factor affecting the vapor pressure of water?

Du
