

Anatomy of cardiovascular block

1-

Which of the following structures does the arrow head refer to?

Vena cava superior and right brachiocephalic vein

Left brachiocephalic vein and left common carotid artery

Right brachiocephalic vein and left subclavian artery

Right brachiocephalic vein and right common carotid artery

2-

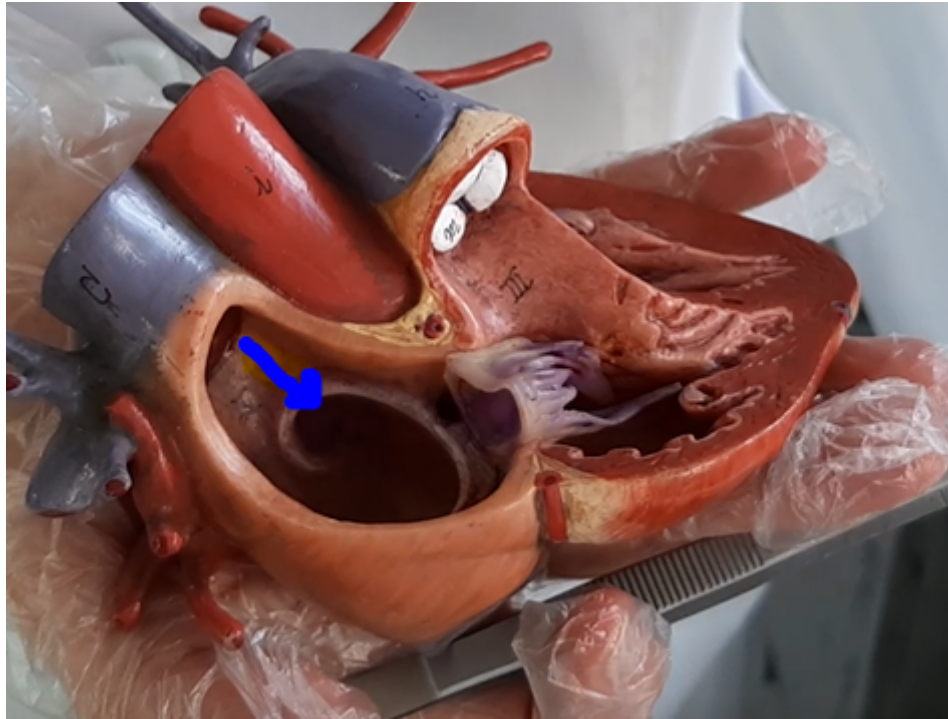

Which of the following structures does the arrow head refer to?

- ✓ Tubercle of rib
- Body of rib
- Head of rib
- Neck of rib

3-

Which of the following structures does the arrow head refer to?

Infundibulum

Moderator band

✓ Limbus fossa ovalis

Valve of coronary sinus

4-

Which of the following structures does the arrow head refer to?

Internal thoracic artery

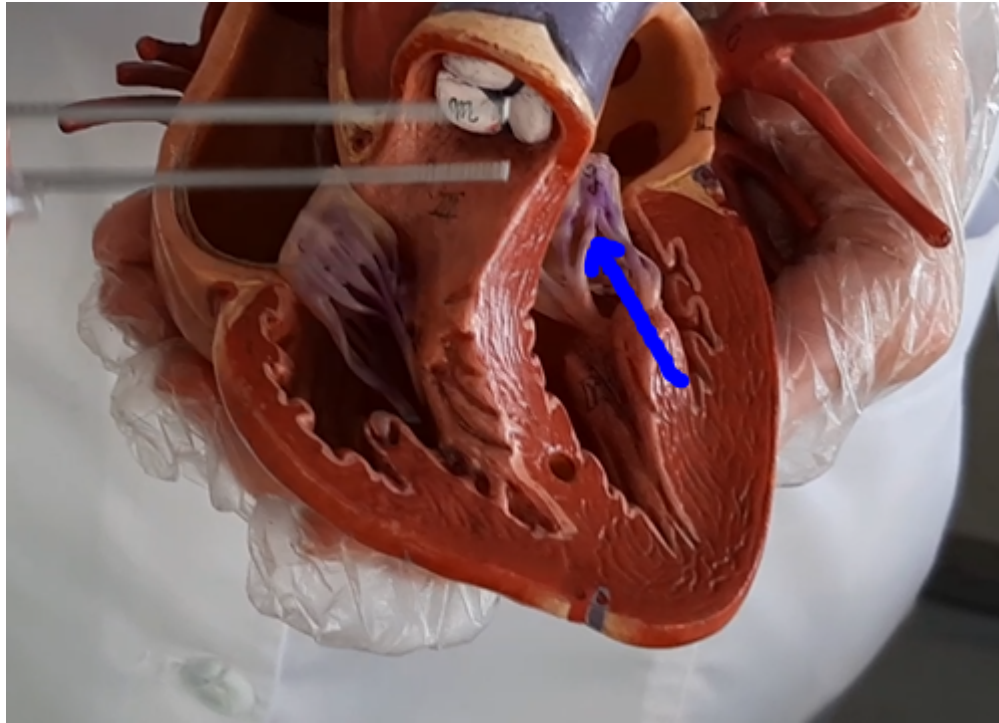

Internal thoracic vein

Sternum

Subclavian vein

5-

Which of the following structures does the arrow head refer to?

Tricuspid valve

Left auricle

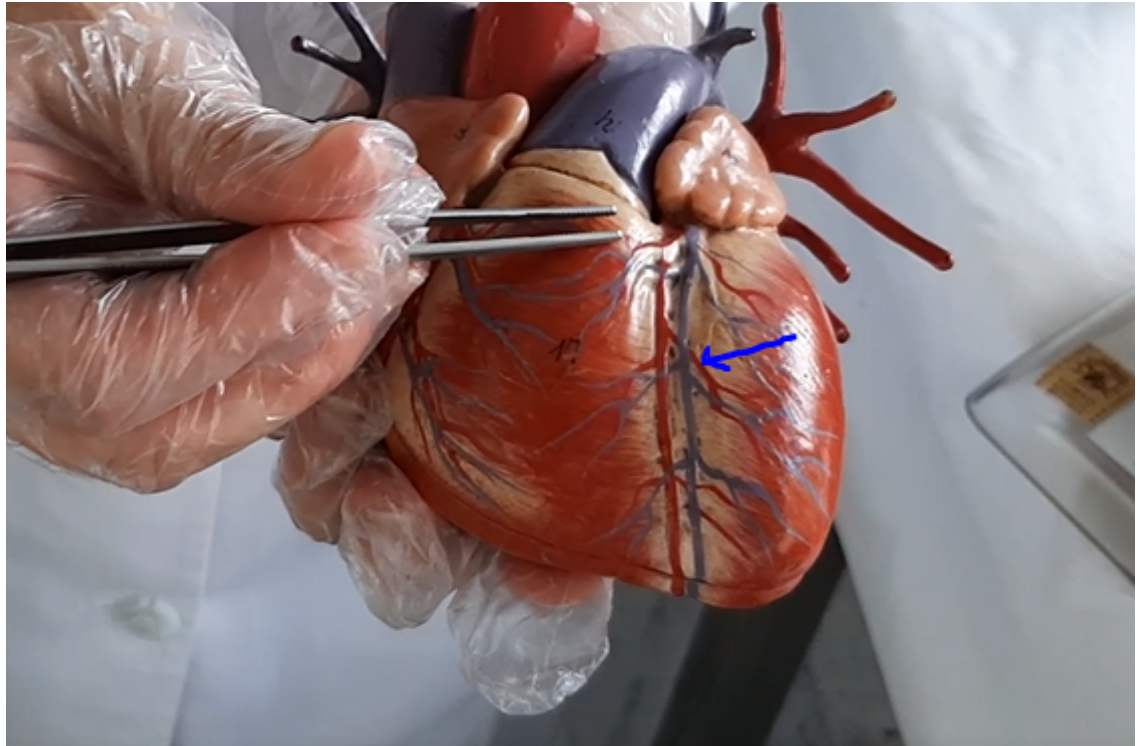

Pulmonary valve

Chordae tendineae

6-

Which of the following structures does the arrow head refer to?

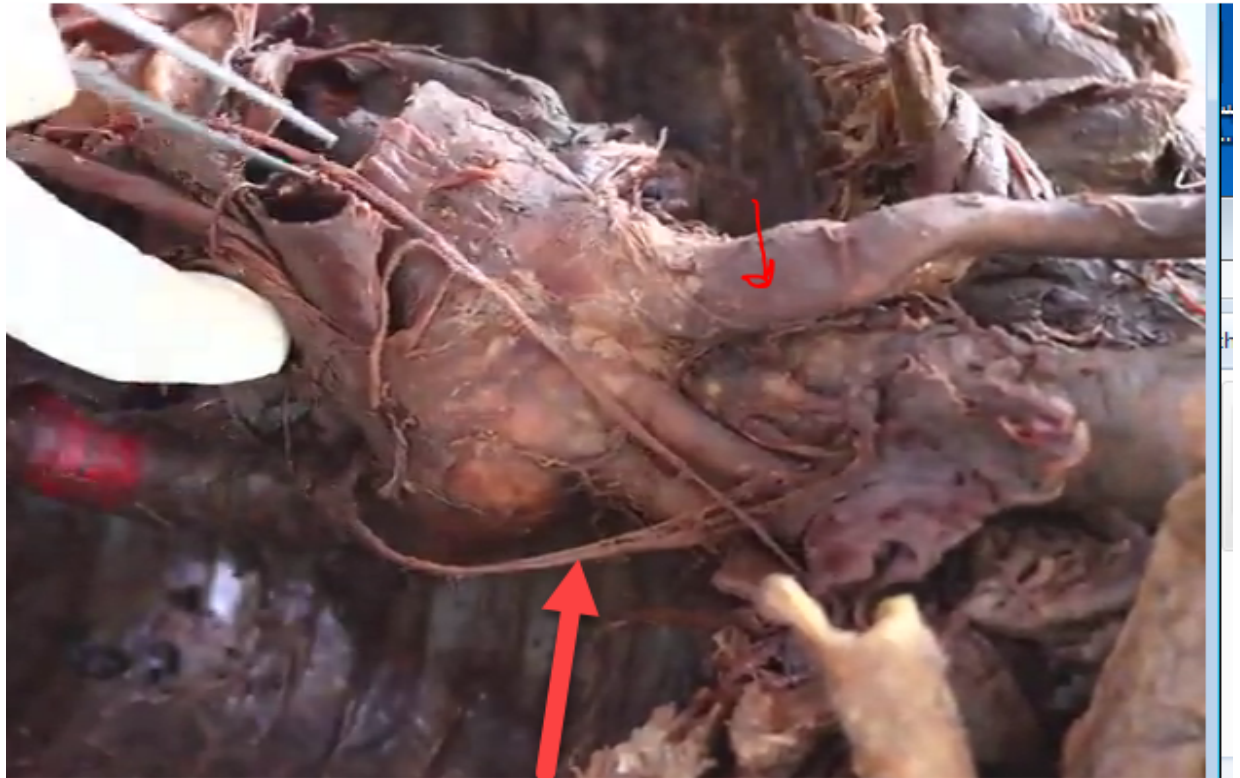

- Lesser cardiac vein
- Circumflex artery
- Right coronary artery
- ✓ Diagonal artery

7-

Which of the following structures does the arrow head refer to?

Pay attention in this picture you can find arch of Aorta and its branches

Left subclavian artery and left subclavian artery

Right vagus nerve and right phrenic nerve

✓ Left vagus nerve and brachiocephalic trunk

Right and left phrenic nerve

8-

Which of the following structures does the arrow head refer to?

Pedicle

Lamina

Vertebral foramen

Superior articular process

9-

Which of the following structures does the arrow head refer to?

Right and left vagus nerve

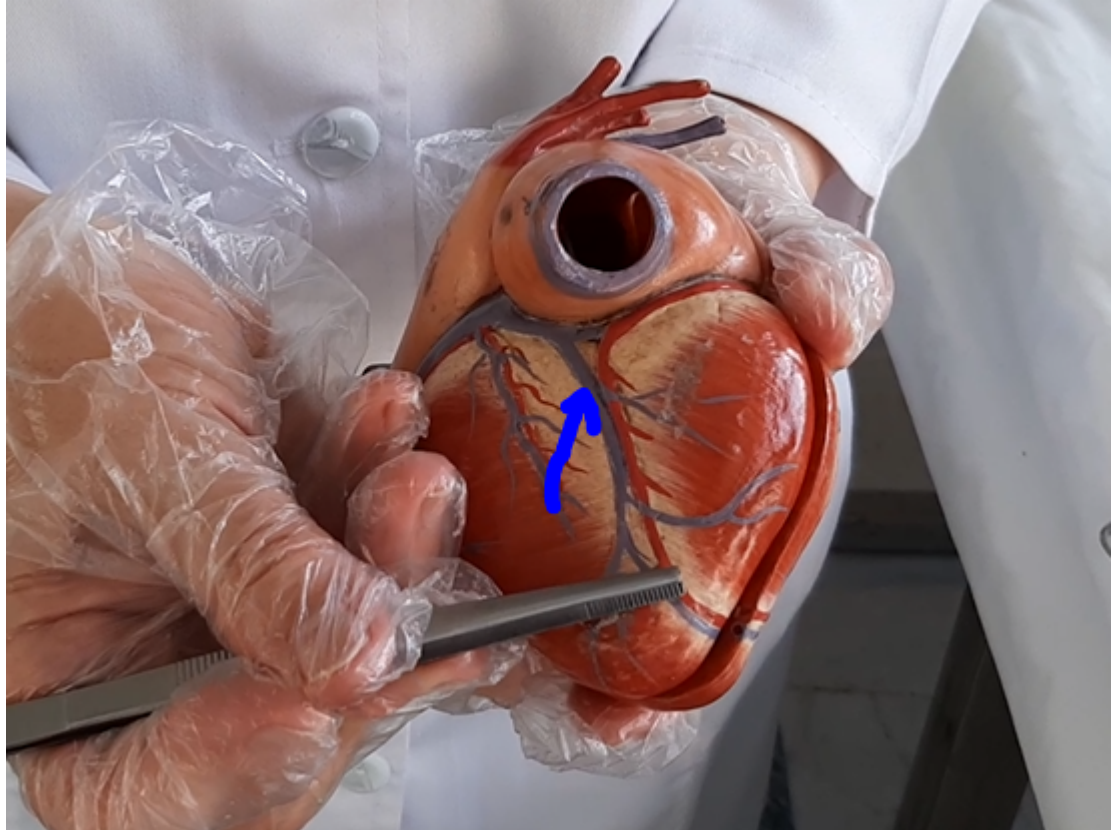

Trachea and phrenic nerve

✓ Right vagus nerve and greater splanchnic nerve

Phrenic nerve and vagus nerve

10-

Which of the following structures does the arrow head refer to?

Lesser cardiac vein

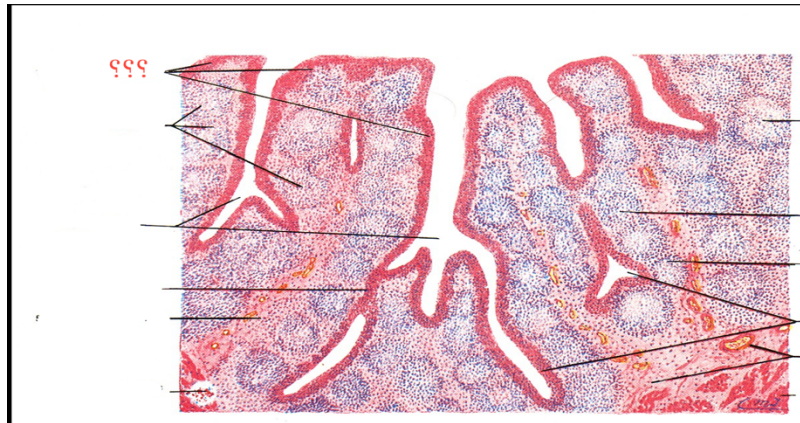

Middle cardiac vein

Greater cardiac vein

Sinus coronary

Histology of cardiovascular block

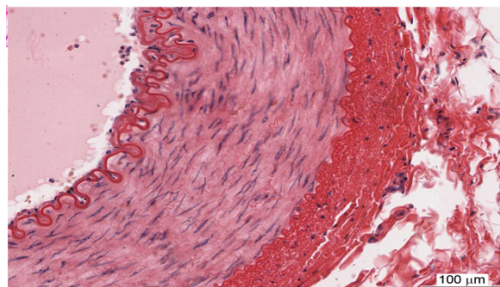

11- Which structure is shown in the picture marked with?

Pseudostratified epithelium in palatine tonsil

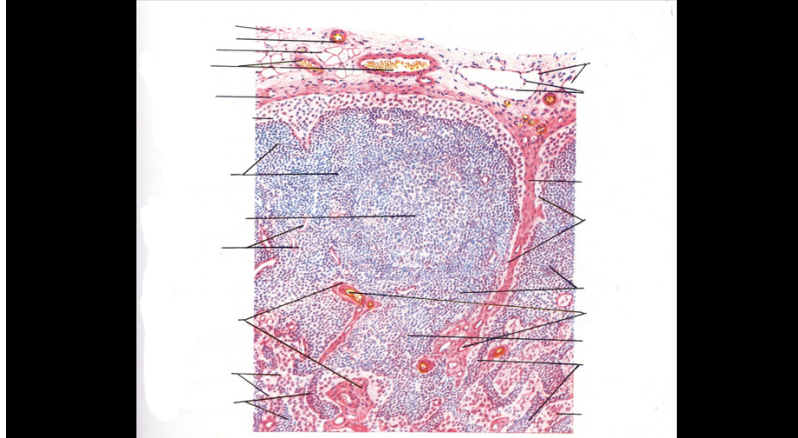

- ✓ Stratified squamous epithelium in palatine tonsil
- Stratified squamous epithelium in pharyngeal tonsil
- Pseudostatified epithelium in pharyngeal tonsil

12- Which type of vessel do you observe in this picture?

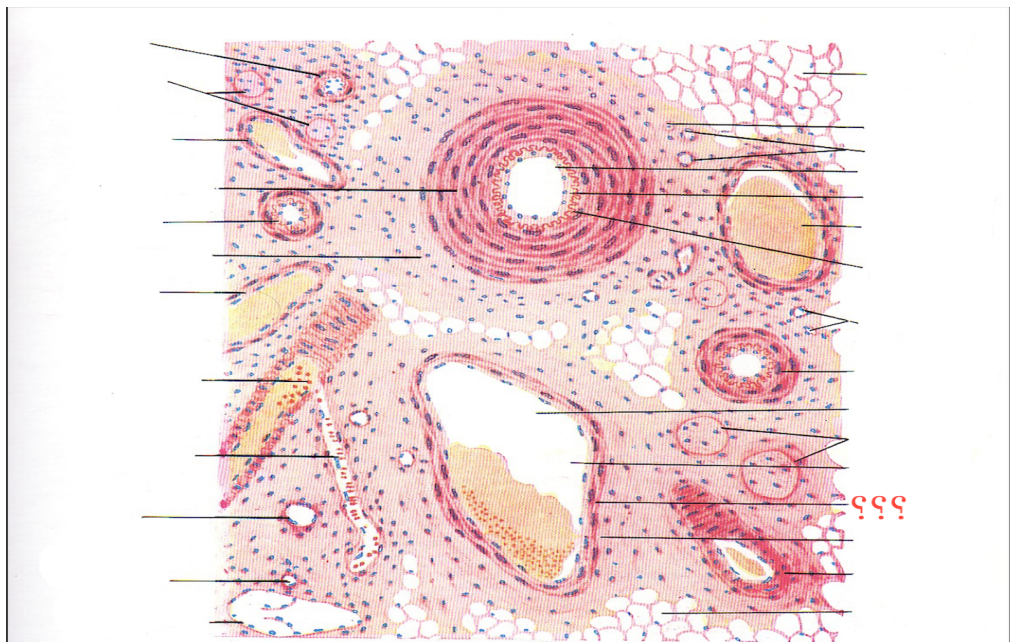

- ✓ Muscular artery
- Elastic artery
- Medium vein
- Large vein

13- Which organ do you observe in this picture?

- ✓ lymphnode
- Thymus
- spleen
- Palatine tonsil

14- Which type of vessel is shown in the picture marked with?

- Medium artery
- Large vein
- ✓ Medium vein
- venule
